With a super slim profile and 6 diameters ranging from 2' to 7', **MICRO RING INDIRECT** is ideal for creating sizable multi-tiered circular arrangements. The ring emits indirect light only and can be coordinated with 5 other emission options in the MICRO RING family for creating light layers. Buoyant and energetic, MICRO RING INDIRECT is just as impactful as a single standalone piece, especially with the halo effect created from the uplight. For sound comfort, MICRO RING INDIRECT is available with an acoustic panel designed to absorb echo and reverberation associated with open-concept spaces, exposed concrete, open ceilings, and large windows.
